EXPERIENCE

Software Development Engineer | Jun 2023 - current

T-Bank (ex. Tinkoff) – Backend for Business

- Contributed to multiple backend services of 3 projects using Java 21/Kotlin, Spring Boot, Kafka, Camunda 7, PostgreSQL, Cassandra
- Developed features Agile communicating with product managers and other teams
- Led development of a finance service from requirements gathering to MVP delivery, the service processes 50 000 ops/minute
- Took part in collecting requirements for technical improvement backlog of our products including PostgreSQL performance, OpenTelemetry, Micrometer
- Reduced PostgreSQL CPU utilization during vacuums on large updates from 100% to 40-50%
- Optimized PostgreSQL I/O usage due to batch job inefficient query, reducing utilization by 40%
- Implemented black-box testing infrastructure for 2 projects with Docker and Cucumber to decrease regress time from 1 week to 30-40 minutes
- Integrated company reliability processes in our team to support products` SLA and to have communication to stakeholders during crashes
- Developed dashboards in Grafana for team products` observability
- Mentored an intern and a newly hired backend engineer to deep them into team`s processes
- Participated as mentor and code-reviewer in 5 students` junior educational program (assignment code reviews and mentoring)

Backend Intern Engineer | Feb 2022 – Jun 2022

SimbirSoft – Intern Project Team

- Contributed to the development of MVP of Kanban board for task managing (Java, Spring Boot, PostgreSQL)
- Assisted teammates to solve local technical issues within our tasks
